Alexandria, VA 22313-1450

Dear Sir:

I have enclosed a revised list of Claims for your review. I have specifically paid close attention to the points mentioned in your first review and have conducted them accordingly:

- 1) Claims 2-19 refers back to the first claim only.
- 2) All claims give a clearly and positively specified definition of the invention in one sentence format as requested.
- 3) The revised claims now display the unique entities of the invention, thus should be non-obvious to the inventions of Wilk, Shirley, Libit et al., Dumas, and Luna.
- 4) Only the unique feature of the kiosk at each golf hole has been included in the claims.
- 5) Only the unique features of the greens within the facility have been included in the claims.

Thank you again for returning my phone call, and I hope the revised Claims meet your approval. Please contact me if there is a need for a revision of the Claims.

Sincerely,

Tony Marshall, Applicant
Patent App.# 10/722,768

THE EMBODIMENTS OF THE INVENTION IN WHICH AN EXCLUSIVE PROPERTY OR PRIVILEGE
IS CLAIMED ARE DEFINED AS FOLLOWS:

1. A golf facility comprising:

a facility layout according to the embodiments of Fig. 2, 3, 4, and 5A, wherein said golf course comprises nine (9), eighteen (18), or any other desired number of holes;

a clubhouse area encompassing miniature golf activities on the rooftop of the said housing with multiple access to the rooftop, including walking up the inclined walls of the clubhouse inclusive to, but not limited to, the embodiments of Fig. 7C, 7D, 7E, and 7F;

a plurality of synthetic practice greens, where each said synthetic practice green includes a specialized activity inclusive to, but not limited to, the embodiments of Fig. 9A and 9B;

a driving range area, in which the target zone makeup is of turf, synthetic turf, water, or any other form, with a plurality of synthetic target greens of various color with an illuminated border of various color using illuminated golf balls of various color, wherein at least one, or some, or all of said synthetic target greens comprise the concept according to Fig. 8A and 8B, and where the tee boxes are divided into two major sections by a large structure to buffer right-handed slice golf shots and left-handed slice golf shots from its neighbouring tee box section inclusive to, but not limited to, the embodiments of Fig 8C;

a plurality of educational station areas, where each of said station area encompass an educational concept inclusive to, but not limited to, the embodiments of Fig 6A;

a plurality of golf holes, where each of said golf hole includes a hole marker that provides the user with dispenser items inclusive to, but not limited to, the embodiments of Fig 11A and 11B;

a plurality of golf holes, where each of said golf holes includes a plurality of initial teeing areas displaced at similar, or at different specific par distances from the target structure depending on the age and skill of its user inclusive to, but not limited to, the embodiments of Fig 10A;

a plurality of synthetic target greens of various shades of color, various undulations, and various shapes and sizes encompassing said alternative golf cup/target structure for each said plurality of holes inclusive to, but not limited to, the embodiments of Fig 13A, 13B, and 13C;

a plurality of golf holes comprising initial teeing areas and a synthetic target green with areas beside and behind the said synthetic target green in relation to said initial teeing areas, such that said areas beside and behind the synthetic target green comprises mounds, berms, and any other forms of elements to decelerate the momentum of over-played golf shots inclusive to, but not limited to, the embodiments of Fig 10A, 10B, and 10C; and

a plurality of alternative golf cup/target structures encompassing the ability to combine disc golf and other types of golf by encompassing a disc target with connected golf cup at the base of the structure.

2. The conceptual design of the golf facility according to claim 1 and embodiments of Fig. 3, 4, and 5A.

3. A golf facility according to claim 1, wherein said number of golf holes determine the desired number of golf hole concepts, wherein at least one, or some, or all of said golf holes comprise the concept according to Fig 4.

4. The conceptual design of the clubhouse area according to claim 1 and embodiments of Fig. 7A, 7B, 7C, 7D, 7E, and 7F.

5. The conceptual design of the synthetic practice greens according to claim 1 and embodiments of Fig. 9A and 9B.

6. A golf facility according to claim 1, wherein said synthetic practice greens comprises two (2), three (3), or any other desired number of synthetic practice greens, wherein at least one, or some, or all of said synthetic practice greens may take the form of a character, a pattern, a shape, or any other preferred appearance within said area.

7. The conceptual design of the driving range area according to claim 1 and embodiments of Fig. 8A and 8B.

8. A golf facility according to claim 1, wherein said driving range comprises three (3), eight (8), or any other desired number of synthetic target greens of various color, wherein at least one, or some, or all of said synthetic target greens comprise the concept therein.

9. A golf facility according to claim 1, wherein said driving range has one or more additional teeing areas that may be a stacked tee alignment, a circular tee alignment, bipolar tee alignment, or any other preferred additional tee alignment method within said initial teeing alignment.

10. The conceptual design of the station areas according to claim 1 and embodiments of Fig. 6B and 6C.

11. A golf facility according to claim 1, wherein said golf course comprises one (1), four (4), or any other desired number of station areas, wherein at least one, or some, or all of said station areas comprise concepts inclusive to, but not limited to, the embodiments of Fig. 6A, 6B, and 6C.

12. The conceptual design of the hole marker according to claim 1 and embodiments of Fig. 11A and 11B.

13. A golf facility according to claim 1, wherein at least one, or some, or all of said initial teeing areas qualify for any combination of par 3, par 4, par 5, or any other specific par value.

14. A golf facility according to claim 1, wherein said one or more additional teeing areas may be a men's tee, a ladies tee, a professional tee, or any other preferred additional teeing area within said initial teeing area.

15. A golf facility according to claim 1, comprising a plurality of synthetic target greens of various shades of color, coordinating with the color of the said alternative golf cup/target structure, flag, hole concept, or any other preferred additional elements within said golf holes inclusive to, but not limited to, the embodiments of Fig. 4, 13A, and 14A.

16. The conceptual design of the alternative golf cup/target structure according to claim 1 and embodiments of Fig. 14A and 14B.

17. A golf facility according to claim 1, wherein said at least one, or some, or all of said alternative golf cup/target structures encompass a disc target golf cup connected by male and female attachments inclusive to, but not limited to, the embodiments of Fig. 14B, or any other forms of assembly.

18. A golf facility according to claim 1, wherein said method of using a golf facility of the type defined in claim 1, comprising:

- the option to play the miniature rooftop course, illuminated driving range, or golf/disc-golf course;

- the selection or assignment of a specific level of initial teeing areas designated for play at each hole of the golf/disc-golf course, such that players tee up at a designated initial teeing area for each hole of the golf course layout;

- playing the holes sequentially by teeing up at the designated initial teeing areas for each hole of said golf course layout based on a golf game commissioned for play;

- giving the player the option to experience the scavenger hunt, or educational station areas placed strategically on the golf course therein;

- players striking a golf ball, and/or hurling a golf disc at each successive hole to attempt to propel it toward the target/cup structure located on the synthetic target green of the hole being played; and

proceeding sequentially to play the subsequent holes of the course in like manner.

19. A method of use according to claim 1, wherein players tee up at the designated initial teeing areas that comprise the golf course layout to be played, such that the golf course layout can be commissioned by:

a golf clubhouse area that administers the golf facility such that various activities can be performed; and

a computer system that controls various activities of the golf facility.
